XF35MM F2 R WR

NOW AVAILABLE FOR PRE-ORDER (22 OCT - 8 NOV 2015)

A standard focal length prime lens which delivers sharp images with rich bokeh. The optical construction of 9 elements in 6 groups (including two aspherical elements) achieves the perfect balance of high image quality and compact size. The lens features the smallest diameter of the line-up and thanks to the inner focus system and stepping motor, it achieves an autofocus time of 0.08 sec*. The exterior of the lens is weather and dust-resistant and can work in temperatures as low as -10°C.

*Complies with CIPA (Camera & Imaging Products Association) guidelines, internal measurement, during high performance mode.

PRE-ORDER PRICE

\$699
